

Kube

KUBE is a compact and pre-wired electro-hydraulic power pack with innovative design. Thanks to its reduced dimensions Kube is ideal to realize:

- elevating roof systems
- tippers
- tail lifts
- similar set-ups on industrial vehicles

KUBE is available with 12V or 24V DC motor, 15 lt tank, pre-wired electrical system, battery switch and alarm signal. Several hydraulic solutions can be combined up to a maximum of 3 ce-top 3 elements besides the emergency handpump.

Control devices can be of manual type, directly positioned on the protection cover, of remote type with spiral wire, or with **trasmittter** positioned inside the cover itself, or through dedicated control unit.

KUBE advantages:

- Compact, heavy and with an eye-catching design
- Rapid and easy to mount and to maintain
- Built-in electrical wiring system in compliance with EC laws
- Very capable tank with possibility to check the oil level
- Emergency built-in handpump
- Both controls and solenoid valves can be extensively configured
